

CROWN

STACKER SERIES

Productivity That Pays Every Day

The Crown Heavy-Duty Stacker Series provides efficient solutions to lift, stack, move and manage product. A versatile Crown stacker can manoeuvre in small spaces, stack pallet loads to maximise space and enhance productivity throughout your operation.

Crown offers a wide range of stacker options to provide the right solution for your operation. Standard features like power steering on all models enhance operability, while unique design characteristics, capabilities and options of each model can help address specific applications and challenges.

Review our heavy-duty stacker series to help determine which model is best suited for your application.

	Straddle	Reach	Counterbalance
			
Stacker Series	SH 5500	SHR 5500	SHC 5500
Capacity	1800 kg	1100 kg 1350 kg 1600 kg	1100 kg 1350 kg 1800 kg
Lift Height	3225-4875 mm	3225-4875 mm	2895-4365 mm
Aisle Width	2502-2682 mm	2564-2776 mm	2900-3380 mm

The flexible, ergonomic design of the **X10® Handle** allows the operator to access the controls from either side of the power unit, providing a clearer view and greater manoeuvrability.

Space Savings

Crown heavy-duty stackers are an easy and cost-effective solution to help save space and improve efficiency. Unlike rider counterbalance trucks, Crown heavy-duty stackers allow you to use narrower aisles (down to aisle widths of 2502 mm) so you can stack more product in the same size space, while streamlining selectivity and workflow.

Compared to internal combustion forklifts, Crown electric stackers are efficient, require less maintenance and avoid pollutants, fuel cost and engine noise.

Load pickup and positioning is enhanced with excellent visibility of the outrigger on straddle stacker models.

The sloped, low-profile power unit cover and open mast design provide excellent fork tip visibility for pallet entry and exit.

! The **easy-to-use handling** allows every user to operate our stackers (no specific license required).

The **brake override** feature on all Crown stackers allows travel with the handle in a near vertical position while staying within the footprint of the lift truck. This feature allows the operator to stand safely to the side of the vehicle and still manoeuvre through a tight turn.

Straddle Stacker

SH 5500 Series

Capacity:

1800 kg

Lift heights:

3225 to 4875 mm

The SH 5500 Series gives operators the simplicity and ease of use they need. It starts with the intuitive controls of the X10® Handle, simplifying every lift truck function. Operators also appreciate the electronic power steering, so precisely controlled that they can easily navigate loads up to 1800 kg with one hand. The high-visibility mast and carriage further enhance ease of use. For moving capacities up to 1800 kg, there's no more user-friendly lift truck than the SH 5500 Series.

Straddle Stacker Turning Radius

With the advantages of brake override manoeuvrability, AC traction and automatic speed control managed by Access 1 2 3® technology, Crown stackers provide a significantly tighter turn radius than typical rider counterbalance lift trucks.

Counterbalance Turning Radius

Reach Stacker

SHR 5500 Series

Capacity:

1100 kg, 1350 kg, 1600 kg

Lift heights:

3225 to 4875 mm

The wide range of benefits offered by the SHR 5500 Series includes exceptional flexibility to solve tough application challenges. It provides an efficient solution for tight work areas and various pallet sizes as well as loads that may be out of reach of other lift trucks.

Operators benefit from:

- High-visibility mast design featuring efficient placement of hydraulics and lift cylinders
- Improved load handling and positioning at height
- Simplified charging with optional on-board charger that connects into any common electrical outlet

Options and Accessories

A full line of options and accessories are available for the Crown Stacker Series to help meet the requirements of your dynamic business and achieve your goals.

Work Assist™ accessories

Wire mesh (Plexiglass also available)

Spring-loaded casters

Freezer conditioning

Drive tyre(s)

Load wheels

Integrated sideshift

Load backrest

Integrated charger

V-Force® Lithium-Ion Ready

V-Force® Lithium-Ion charger

InfoLink® Operator & Fleet Management

Counterbalance Stackers

SHC 5500 Series

Capacity:
1100 kg, 1350 kg, 1800 kg

Lift heights:
2895 to 4365 mm

The SHC 5500 Series is a counterbalanced stacker, providing stability without the need for outriggers. This versatile lift truck is also available with optional attachments, making it ideal for trailer loading/unloading, dock work, put-away, block stacking and short transport.

The SHC 5500 Series offers exceptional sightlines directly to the fork tips, which facilitates load handling and positioning at floor level and at height.

Not all accessories are available on every stacker. Contact your Crown dealer for details.
