SIDE RESTRAINTS

You'll never pay to replace a side restraint

Engineered for extreme durability. Crown's side restraints are guaranteed tough.

Crown understands tough applications from dock work to transporting or stock keeping. When impacts occur to forklift trucks equipped with folding platforms, the folding side restraints are often damaged, sometimes beyond repair.

Walk into any busy application and you'll quickly spot the problem; bent, broken, malfunctioning or missing side restraints are all too common. **Unless it's a Crown.**

We're so confident in the strength and durability of our folding side restraints that we've **guaranteed them for the life of the vehicle.***

Heavy-duty side restraints feature 50 mm diameter heavy-wall steel tubing and rugged C-clamp mounting system.

Tired of being told damage is not covered by the truck warranty?

With Crown, damage billing for side restraints is a thing of the past.

*Includes parts and labor to repair or replace side restraint and mounting clamps for the original owner and trucks which follow the intended use described in the operator manual. Soft cushions (wear item) not included.

Built for the real world

All folding platform side restraints are not created equal. Many use light-weight tubing and plastic mounting clips. They easily bend or break and cost money to repair or replace.

Now look at Crown's design. Heavy-wall steel tubing. Rugged, machined metal C-clamps. Restraints that pivot up and down, not towards the operator. Highly visible safety orange colour.

Strength and durability to survive in the real world.

Guaranteed.
