Renewed Lift Trucks

Guaranteed Performance. Enduring Value.

RENEWED RELIABILITY

Crown's Encore Renewed Electric Lift Trucks are produced in a dedicated manufacturing facility to meet the same consistent quality controls as our new trucks. That's why you can count on Encore trucks to perform exceptionally well and at a competitive price. There's an Encore lift truck available for a variety of material handling needs.

Exceptional warranty, support and service with Crown Integrity Parts and Service: it's what you can expect and what we guarantee with every Encore lift truck from Crown.

Better than "Certified, Pre-owned"

Encore electric lift trucks are factory renewed with 100 per cent Crown Integrity Parts—the same parts used in our new lift trucks—so you can count on them to look, last and perform like new.

Guaranteed to Perform

Each Crown Encore electric lift truck is rebuilt to exacting standards and backed by a 1-year warranty for major components, with no hour limits. Wearable parts carry a 90-day warranty, just like a new truck.

Environmentally Responsible

Recycling Parts reflects Crown's corporate commitment to sustainability. Thanks to our unique vertically integrated manufacturing approach, we're able to reclaim and reuse materials and reduce waste while providing value to our customers.

Factory Support

Just like every new Crown electric truck, every Encore lift truck is eligible for factory service and support, provided by Crown's responsive branch and dealer network.

PRECISION PROCESS

Crown's process involves much more than component inspection and new paint. We take a systematic approach to inspect, repair, replace and recycle lift truck parts. Because of our vertically integrated manufacturing approach, Crown has access to needed parts to quickly and efficiently revitalise our electric forklifts and guarantee the results.

Meticulous Inspections

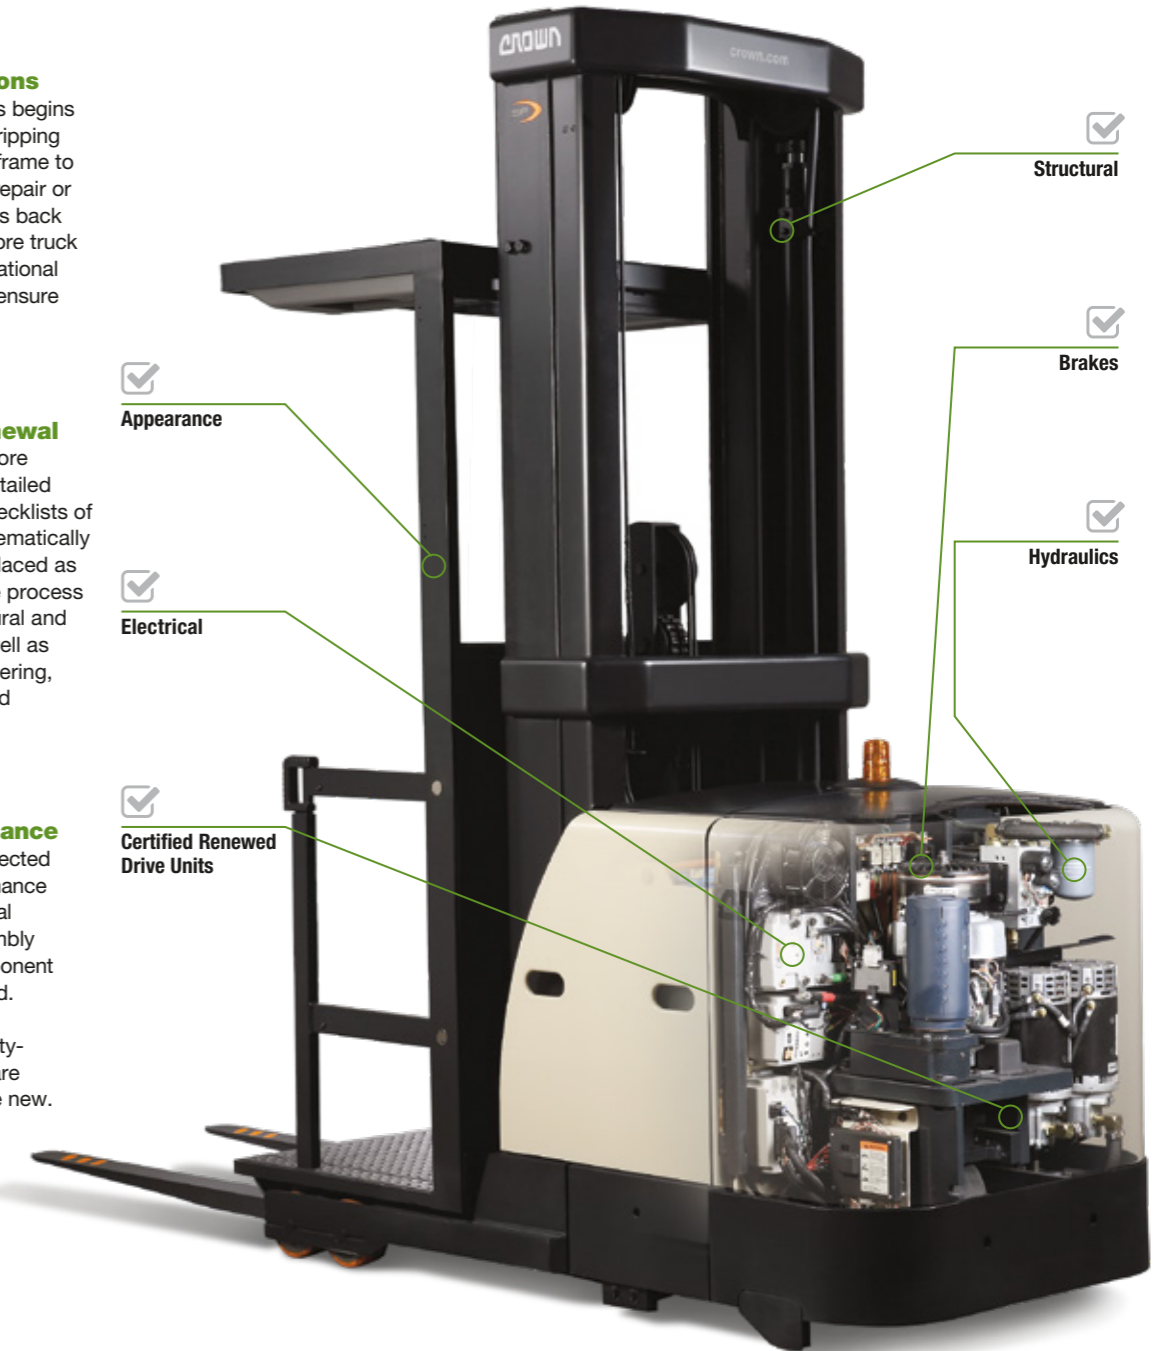

Our factory-based process begins with Crown technicians stripping each electric forklift to its frame to meticulously inspect and repair or replace key parts that goes back into the forklift. Every Encore truck undergoes extensive operational and safety inspections to ensure that it performs like new.

Comprehensive Renewal

The process for each Encore electric lift truck utilises detailed electric model-specific checklists of components that are systematically inspected, tested and replaced as needed on every unit. The process includes electrical, structural and exterior components as well as drive units, hydraulics, steering, brakes, bearings, tyres and load wheels.

Guaranteed Performance

Every Encore truck is subjected to comprehensive performance testing and extensive visual inspection following assembly to ensure that every component meets the Encore standard. Our standardised process delivers dependable, quality-consistent lift trucks that are guaranteed to perform like new.

The Smart, Sustainable Choice
