

Smart and Powerful.

It's one thing to engineer a truck that has the power to perform in demanding reach truck applications. It's another to create a truck with intelligence and technology that stands apart from the rest.

Productivity That Pays.

At the end of the day, the truest measure of a reach truck is getting the job done—quickly and safely.

You need a truck you can count on, in the short-term and long-term. One that rises to any challenge and delivers at every turn: more pallet moves, greater operator comfort and control, rock-solid performance and uptime.

Depend on the RR 5700 Series from Crown.

Comfort.

Innovative features and exceptional design give operators unmatched comfort for confident, safe performance.

Control.

With smart systems, an intuitive all-in-one handle and a Load Handling Assist option, the RR 5700 enables pinpoint accuracy and control.

Performance.

Every component is engineered by Crown to deliver optimal performance while lifting, lowering, maneuvering and more.

Uptime.

Crown's systematic approach to uptime encompasses everything from design and manufacturing to diagnostics, service and parts.

Handle, Armrest and Seat

The Crown S Class truck features an adjustable handle, armrest and seat. This enables operators to choose to lean, sit or stand for optimum control and productivity without compromising visibility, safety and comfort.

Confident Comfort.

It's a fact: operators who are more confident get more done—every shift, every day. That's why Crown engineers dedicated years to develop fully integrated compartment features that optimize ease of use, comfort, confidence and safety.

- Entry Bar™ Safety Switch encourages safe foot position within the operator compartment by reducing travel speed, sounding an audible alert and showing a message on the display when depressed.
- 2. Suspension Floor Board provides a cushioned, shock absorbing ride and a Dual Pedal design requires both feet properly positioned for travel.
- **3. Elevated Footrest** reduces shift-long operator fatigue.

- Multi-Task Control Handle supports the ability to perform multiple tasks simultaneously.
- **5. Full Back Support** whether an operator chooses to sit, lean or stand.
- **6. Variable Side Stance**provides five solid points of contact for secure operator positioning and offers maximum visibility in either travel direction.

ThermoAssist™ Package offers a practical, cost-effective way to improve operator comfort and productivity. A mast air deflector and heated armrest and backpad (heated seat for S Class trucks) make cold environments more comfortable.

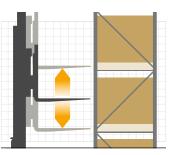

Precise Control.

Lifting valuable, variable loads at height challenges even the most seasoned operators. That's why the Crown RR 5700 Series integrates a number of control features that contribute precision and confidence for the operator.

Smart Systems

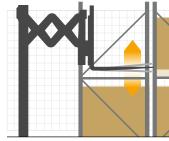

Crown combines engineering, manufacturing and integrated technology to proactively improve safety and performance. The RR 5700 Series continually monitors and analyzes truck activity to enable intelligent, optimized control of:

- Travel speed: optimizes speed and braking, based on weight on forks, fork height, tire slip and direction of travel.
- Cornering speed: adjusts speed in turns, based on angle of steer wheels, truck speed and weight on forks.
- Position hold: avoids unintended travel by maintaining position when resistance is encountered, or when stopped on inclined surfaces.

One-Touch Rack Height Select

option allows the operator to simply press a button between rack levels (raising or lowering) to automatically stop the forks at the next level.

Tilt Position Assist

option levels the forks with a simple command via the multi-task control handle.

Multi-Task Control Handle

Crown delivers intelligent control through an intuitive, integrated handle that allows operators to control travel direction and speed while maneuvering during lift and reach operations.

Pure Performance.

To move more pallets, you need everything working together. Crown's complete system approach to design and engineering links every component for fine-tuned power, speed and productivity. That's pure performance.

The Speed You Need in Every Stage.

The RR 5700 Series delivers the right lift, lower and travel speeds when you need them. By tuning the truck to match the operator, application and task, you get the power, efficiency and performance, every time.

Maximum Travel Speed (mph)

Dependable Uptime.

At Crown, we recognize that a truck only contributes when it is fully engaged in the work at hand. To this end, we know that vertically-integrated trucks perform better and longer than those that are simply assembled.

That's why Crown engineers are focused on developing systems that ensure uptime. This includes motors designed and manufactured by Crown to consistently deliver greater power and Crown-built controllers with faster processing speeds for more responsive, reliable performance.

Exclusive Quick-Change Load Wheels

Changing consumables such as load wheels no longer has to put a strain on productivity. With optional Quick-Change Load Wheels from Crown Integrity Parts, you can be back in business in a matter of minutes.

More uptime for your investment

Crown's integrated approach combines truck feedback and diagnostics, Crown-made parts and dedicated service teams to give you more uptime and the lowest total cost of ownership.

CROWN

OnTrac® Anti-Slip Traction Control

Crown's exclusive OnTrac Anti-Slip Traction Control

significantly reduces tire spin during acceleration,

plugging and braking. The result? A significantly

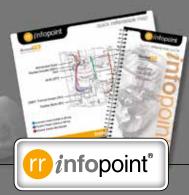

shorter stopping distance and longer tire life.

Access 1 2 3® technology enables advanced diagnostics through an intuitive display. This diagnostics system, used across all Crown trucks, increases technician proficiency, resulting in significant savings in service time and costs.

InfoLink® is a wireless operator and fleet management solution that puts the power of accurate, up-to-date, business metrics right at your fingertips.

Crown's InfoPoint® Quick
Reference Guide and on-truck
component maps provide
technicians with vital information
to quickly, accurately and easily
resolve issues without wiring
diagrams or schematics.

Crown's Integrity Parts and Service System® solutions ensure long-term truck performance by matching trained technicians with Crown-made parts for long-lasting performance. That's a major difference with Crown.

Expand Your Reach with the Crown RR 5700 Series.
