

CROWN

C-D

22,000–36,000 lb Capacity

Diesel Pneumatic Tire

Built Strong to Last Long

Built to handle 22,000 to 36,000 pounds, the Crown C-D Series pneumatic forklift delivers powerful performance. In addition to the lift, the truck's impressive rigid chassis and the power of the electronically-controlled industrial diesel engine, the operator compartment delivers comfort that instills confidence.

For greater throughput and more uptime with less maintenance, the C-D Series is a powerful choice.

Comfort and Control Within Reach

Operators spend their entire shift in the driver's seat, where the Crown C-D Series cabin provides them wide-open front views. The expansive cabin is designed to provide operators everything they need within an arm's length for exceptional levels of comfort and safety.

Full Color LCD Display

A standard 5-inch display provides clear views of all the information the operator needs to know, plus more. Three selectable performance levels can be set directly from the display and easily changed when needed.

Combination Braking and Inching Pedal

An oversized pedal combines braking and inching into one convenient control.

For the Toughest of Applications

Crown's high capacity diesel forklift is ready for demanding applications. From lumber, steel and metal, construction, concrete, brick and stone industries to mining and oil/pipeline applications, this high-capacity forklift meets power and performance requirements.

Full Solution Provider

Crown is a full solution provider of internal combustion forklifts with capacities ranging from 3,000 to 55,000 pounds, providing expert assistance through a proven support network. We'll help match the right forklift to your application, then provide the sales, service and factory support to help ensure a long and productive service life.

Serviceability and Low Maintenance

- Pre-cleaner
- Dual-element air cleaner
- Large capacity, variable-speed, hydraulically-driven powertrain cooling fan
- Wide-open service compartments
- Easily accessible system components

Optional Convenience Features

- Reversible hydraulically-driven powertrain cooling fan
- Rear engine guard in steer wheel wells
- Air compressor
- Full cabin
 - Heat and A/C
 - Heated mirrors
 - Roof vent
 - Front and rearview cameras

Standard Durability

A rigid drive axle with solid one-piece cast iron housing ensures components are closely aligned, providing more torque transmission to the drive wheels and better weight distribution. Reduced axle stress helps extend service life.

- Fully enclosed oil-cooled disc brakes backed by a 5-year, 10,000-hour warranty
- 3-speed automatic ZF powershift transmission

Hydrostatic Power Steering

A heavy-duty steer axle with large king pins and sealed tapered roller bearings absorb impact and keep moving parts free of contamination.

Long-Lasting, Heavy-Duty Performance.
