

CROWN

C-D

40,000–55,000 lb Capacity

Diesel Pneumatic Tire

Reliability to Handle Large Demands

Built to handle 40,000-55,000 lbs, Crown C-D heavy duty diesel-powered forklifts are powerhouses for heavy lifting jobs. The robust chassis, operator-centric design and powerful, fuel-efficient engine combine to provide unmatched comfort, longevity and productivity.

For tackling heavier loads with ease, this larger capacity vehicle with 48-in load center is the proven choice.

Built for Comfortable, Confident Operations

In large-scale operations, lift truck operators can spend many hours in the driver's seat. That's why the Crown C-D Series cabin was designed with the operator in mind, prioritizing comfort and ergonomic benefits. The open layout provides easy access to controls, wide front views and low-effort operation.

Hydraulic Cooling Fan

Driven by a remote hydraulic motor, the large-capacity cooling fan manages operating temperatures to reduce engine wear while optimizing efficiency.

All-in-one Brake Pedal

The operator can easily regulate speeds and precisely maneuver throughout the environment while lifting at full power.

Confidence in Every Move

Crown's operator compartment is equipped with an ergonomic adjustable seat and easy-to-reach controls for lifting, tilting and positioning. The hydraulic pilot control lever provides smooth, precise movements, which help ensure exceptional control for demanding lifting tasks.

Full Solution Provider, Crown Support

Crown is a full solution provider for Internal Combustion engine forklifts from 3,000 to 55,000 lb capacity, providing expert support through our extensive sales and service network.

Durability and Low Maintenance

- Dual-element air cleaner
- Large-capacity, variable-speed, hydraulic-driven power train cooling fan
- Wide-open service compartments
- Easily accessible system components for reduced downtime

Additional Features

- Long-lasting LED lights with convenient safety function for low-light conditions
- Eight roller bearings ensure faster, responsive movement
- Operator Sensing System
- Full cabin
 - Wide viewing angle
 - Air conditioning and heat
 - Panoramic mirror
 - Front and rear-view camera
 - Wide open floorboard
 - Adjustable telescopic steering column

Reliable Powertrain

The drive axle, transmission, brakes and power train components are built for long-lasting durability. The automatically-controlled 4-speed transmission automatically adjusts to provide the ideal gear ratio to enhance optimal performance.

Hydrostatic Power Steering

A heavy-duty steer axle with large kingpins and sealed taper roller bearings absorbs impact and keeps moving parts free of contamination.
