

## CUSTOMER RESULTS

“Everybody loves the way the C-5 works, the way it looks. We hear nothing but rave reviews. Honestly, I don’t know if we would be able to conduct our business without it.”

## Flyte Camp

### Crown’s C-5 Series Provides Power, Precision and Maneuverability in Tight Spaces

#### APPLICATION

Flyte Camp, located in Bend, OR, is a vintage travel trailer restoration and custom renovation shop. Since its establishment in 2010, owners Justin and Anna Scribner have expanded the company’s project to include the television series, *Flippin’ RVs*, for the Great American Country network and have recently filmed a new series for the Travel Channel titled *Beachin’ RVs*. Turning their passion into reality, Justin and Anna have also developed their own line of vintage-inspired travel trailers, the Flyte Camp Neutron.

#### CHALLENGE

With multiple projects moving through a variety of workstations throughout the restoration facility, space is often at a premium. This challenge is compounded during the filming of the television series, when the film crew and their equipment makes for even tighter working conditions. Employees must be able to move large, heavy trailers between workstations without the risk of damage to irreplaceable parts. The harsh weather conditions during Bend, Oregon winters add to the challenge as trailers are moved from an outdoor staging area into the restoration facility. Maneuverability and precision are key to keeping multiple simultaneous projects moving.

#### SOLUTION

The Crown C-5 tackles the challenge of maximizing productivity within their tight working conditions. Its industrial LPG engine and Crown Power Brake System provides the power and precision to move large trailers with precision and confidence, often with only inches of clearance. Employees appreciate the ergonomic controls, high visibility operator’s compartment and optional cabin that enables them to keep projects moving no matter the weather.

The company is recognized for new trailer builds and restoration projects that are known for their perfect blend of form and function and the owners feel that the C-5 Series evokes that same feeling, not only with their employees but also with customers who visit the facility to view their project in process.

#### RESULT

- **Power, precision, maneuverability** of the C-5 Series enables operators to safely move virtually irreplaceable trailers in tight quarters sometimes with only inches to spare
- The **ergonomics and visibility** in the C-5 Series hard cabin allows the operator to move the large trailers with ease and confidence, all year round
- The **blend of form and function** in the Crown C-5 Series mirrors the design philosophy that Flyte Camp brings to their restorations and new builds and resonates with visitors to their facility
