

CROWN

encore®

Guaranteed Performance. **Enduring Value.**

# RENEWED RELIABILITY

Crown's Encore® Renewed Electric Lift Trucks are produced in a dedicated manufacturing facility to meet the same consistent quality controls as our new trucks. That's why you can count on Encore trucks to perform exceptionally well and at a competitive price. There's an Encore lift truck available for a variety of material handling needs.

Exceptional warranty, support and service with Crown Integrity Parts and Service:

## Better than "Certified, Pre-owned"

Encore electric lift trucks are factory renewed with 100 percent Crown Integrity Parts®—the same parts used in our new lift trucks—so you can count on them to look, last and perform like new.

## Guaranteed to Perform

Each Crown Encore electric lift truck is rebuilt to exacting standards and backed by unmatched warranty: 1-year for major components, with no hour limits. Wearable parts carry a 90-day warranty, just like a new truck.

## Environmentally Responsible

Remanufacturing and recycling are part of Crown's corporate commitment to sustainability. Thanks to our unique vertically integrated manufacturing approach, we're able to reclaim and reuse materials and reduce waste while providing value to our customers.

## Factory Support

Just like every new Crown electric truck, every Encore lift truck is eligible for factory service and support, provided by the industry's most responsive and qualified dealer network.

Don't be tempted to purchase a used truck just because it's available. Your local Crown dealer has access to the full line of Encore products, factory renewed and ready for delivery when you need them.

# PRECISION PROCESS

Crown's remanufacturing process involves much more than component inspection and new paint. We take a systematic approach to inspect, repair, replace and recycle lift truck parts. From start to finish, our thorough factory-based remanufacturing process ensures nothing is overlooked. Because of our vertically integrated manufacturing approach, Crown has immediate access to needed parts to quickly and efficiently remanufacture our electric forklifts and guarantee the results.

## Meticulous Inspections

Our factory-based remanufacturing process begins with Crown technicians stripping each forklift to its frame to meticulously inspect and repair or replace every part that goes back into the forklift. Every remanufactured truck undergoes extensive operational and safety inspections to ensure that it performs like new.

## Comprehensive Renewal

The remanufacturing process for each Encore lift truck utilizes detailed model-specific checklists of components that are systematically inspected, tested and replaced as needed on every unit. The remanufacturing process includes electrical, structural and exterior components as well as drive units, hydraulics, steering, brakes, bearings, tires and load wheels.

## Guaranteed Performance

Every Encore truck is subjected to comprehensive performance testing and extensive visual inspection following assembly to ensure that every component meets the Encore standard. Our standardized process delivers dependable, quality-consistent lift trucks that are guaranteed to perform like new.

## The Smart, Sustainable Choice
