

Versatile Industrial Charging Systems

V-110 Plug In 24v Charger

Easy and Affordable Battery Charging

Features:

- 40 amps DC output
- 24v batteries with amp hour range of 300-550
- Maintenance mode keeps batteries charged while in storage
- Self-detecting input automatically senses and adjusts to single phase
- AC voltage ranges 100v-240v
- Includes SB175 gray connector and 10' DC cable

The V-110 Charger utilizes High Frequency Charger Technology with an IEL profile for flooded batteries and an IE profile for sealed, lead acid batteries.

As single shift application charger, the V-110 Charger is commonly used to charge Walkie Pallet Trucks containing industrial battery sizes 12-85-5 and 12-85-7.
