# Small Footprint Big Results

Big is not always best, especially where space is limited. Take the Crown C-G Series: it's tough and nimble while delivering the right capacity for many jobs—with impressive maneuverability, reduced fuel consumption and more value for your lift truck investment.

This Crown 3,000 to 4,000 pound cushion forklift combines comfort, control, performance and Crown's proven support network to deliver a solution that provides big results, even in small spaces.

**Get moving with the C-G Series.**

## Comfort

Ergonomic features offer greater comfort for operators all shift long.

## Control

Precise control builds operator confidence for a range of applications.

## Performance

With a small footprint and easy maneuverability, the C-G Series is ready to tackle a variety of tasks in tight spaces.

## Support

From responsive service and parts availability to training and fleet management solutions that encourage safe operation, Crown's value extends far beyond the lift truck.

# Operator Comfort

The Crown C-G cushion lift truck delivers shift-long comfort and confidence to the operator through a spacious operator compartment, steering column innovations and ergonomic suspension seat. In addition, the low step height makes it easier to step on and off the lift truck.

## Operator Compartment

The operator compartment is designed for optimum space, plenty of leg room for easy entry and exit as well as shift-long comfort. Ergonomically located pedals, plus ample floorboard, overhead guard and foot clearance, provide room to move even for taller operators.

## Suspension Seat

The standard seat offers a range of comfort and convenience features, including a spring-adjustable suspension seat bottom, an adjustable-tilt seat back, a standard high-visibility orange seat belt and a large storage pouch.

## Tilt and Telescoping Steering Column

The tilt and telescoping steering column, along with the small steering wheel, accommodates operator reach by tilting up or down and moving closer or farther away from the operator. It also allows for easy entrance and exit.

## Low Step Height

Easy entry and exit is facilitated by a low step height and grab handle, which contributes to safety and ease of use in on/off applications.

# Operator Control

Comfort and control must work hand in hand. Operators can depend on the C-G Series' control features, including a solid chassis, precision steering, responsive pedal control, electronic braking and informative LED display.

## Smaller Chassis

A smaller chassis enables the C-G Series to move with ease in narrow aisles, especially with 36" pallets or when traveling in narrow blocked stacked aisles.

## Responsive Pedals

Ergonomic pedals allow operators to maneuver between accelerator and brake and perform controlled inching, braking and accelerating more efficiently, reducing operator fatigue.

## LED Display

The easy-to-read LED screen provides operators with helpful diagnostic and performance settings.

## Electronic Parking Brake

The electronic parking brake enhances safety and provides convenience to the operator.

## USB Ports

Two USB ports are standard.

## Heavy-Duty Cooling Package

Optional vented side panels and dual core radiator features are best for high-heat applications to keep the powertrain from overheating, while keeping the operator cooler for better comfort throughout the shift.

Crown's industrial dual radiator provides separate cooling for the engine and transmission, reducing fluid temperatures to protect and extend powertrain life. The optional heavy-duty cooling package is available for more demanding applications.

**5-Year**  
Warranty  
10,000 hrs.

## Oil-Cooled Disc Brakes

Fully enclosed, oil-cooled disc brakes seal out environmental contamination for performance and longer life, and stopping is accomplished with less pedal effort. It's all protected by a 5-year, 10,000-hour brake warranty.

# Industrial Performance

When you invest in Crown C-G Series lift trucks, you get both stability and agility. With its 3,000 to 4,000 pound capacities, full-shift operator comfort, comprehensive control and industrial features, you can achieve nimble, precise performance.

# Crown's Proven Support

Crown support begins long before this lift truck leaves the factory. Our integrated approach to service provides the best user experience to our customers—before, during and after the sale.

## Safety and Training

Our comprehensive training programs for operators, supervisors, technicians—and even pedestrians—can help support your efforts to provide a safe and productive work environment. Our Demonstrated Performance® TrainSafe Train-the-Trainer program offered locally can provide your organization with tools to efficiently train new operators using your own resources. At our Regional Training Centers, DP Service Technician Training goes above and beyond traditional classroom training, allowing participants to work on lift trucks with instructor supervision.

## Integrity Parts and Service

Crown's forklift maintenance and repairs keep your equipment running—regardless of brand. From time and material to complete maintenance, our Integrity Service System offers a variety of service plans to suit your needs in the most efficient and cost-effective way. Our well-stocked, GPS-dispatched service vans ensure your service technician arrives with the right part at the right time.

## Fleet Management

InfoLink® Operator and Fleet Management puts the power of accurate, on-demand business metrics at your fingertips. When robust data drives confident decisions, your organization can achieve improved results in safety and compliance, higher productivity, lower costs and optimized operations. InfoLink Data Services can help create a solid foundation to help you achieve your goals and provide data integration and other consultative services to continue your journey.
